CERTIFICATE OF STATE REVIEW BOARD

We, the members of the State of Alaska State Review Board, have reviewed the materials from the Precinct Election Boards and Regional Counting Boards to ensure that the number of ballots cast, counted, and shown on the election results produced by the state's ballot tabulation system equals the number of actual voters and that the results are accurate. The State Review Board also reviewed the Precinct Election Board's ballot accountability statement, confirming the number of signatures on the precinct register, the number of questioned ballots, and the number of special needs ballots.

Additionally, we conducted hand-count verifications of the following: one random precinct in each of the 40 house districts that utilize precinct scanners; early voted ballots, absentee ballots, and questioned ballots in randomly selected house districts with representation within each of the five regional offices.

As members of the State of Alaska State Review Board, we do hereby certify we reviewed the votes cast in the November 8, 2022, General in accordance with Alaska Statute 15.15.430.

We further certify that the results of this review are detailed in the 2022 General Election Official Results, the Official Statement of Votes Cast and the Ranked Choice Voting Detail Report as they appear on the Division of Elections website and filed and retained with the Division of Elections.

OATH OF STATE REVIEW BOARD

I swear upon oath that I have honestly and faithfully performed my duty as a member of the State Review Board according to the provision of law and certify that these are the official results.
